

Provide your organization with the TOOLS needed to efficiently and effectively deliver on your agency's Field based Operational Best Practices.

Why should you use TrueAIM?

- ◆ Better Customer Service
- ◆ Error Free Data Collection
- ◆ More Accurate Bills
- ◆ Improve Staff Utilization
- ◆ Instant Reporting at your fingertips

"TruePoint spent time to really listen to our business needs. They surprised us with their detailed understanding of what we did, and then they improved upon some of our processes that we didn't expect" Gerry Giesel, Water Operations Superintendent, Central California Irrigation District (CCID), Los Banos, CA

"Our involvement with TruePoint has been very rewarding. We feel we received everything we expected and more from the software provided" Chris White, General Manager, CCID.

TrueAIM delivers a solution which enables field based canal staff to more effectively take water orders, monitor consumption, and efficiently exchange data from the field to the office for timely, accurate billing of your Agricultural Irrigation Customers. Using the most current techniques and proven methods for wireless communications between field devices and office servers, TruePoint has eliminated the burden of complicated communications and synchronization routines. Make your staff more productive by giving them better tools and more timely data in the field, allowing them to provide a higher level of customer service to your irrigation accounts.

TrueAIM Features and Benefits

1. Detailed information about your irrigation customers
2. Generate County AG reports on crop type and acreage being irrigated
3. Consumptive Use Readings; Flow Metered or Quantity Metered
4. Automatic CFS to AF calculations
5. Dynamic Field Groupings for shared irrigation events
6. Provides near real-time diversion statistics
7. Track Water Turn on's, initial flow rates, changes to flow rate, turn off's, & total consumptive use by irrigation event
8. Provide field staff with daily route sheets, 'To Do' lists
9. Facilitate Water Orders from the field to the Water Master
10. Historical consumptive use reporting by grower/crop/season
